More than 7,000 beer sommeliers worldwide have been trained at the Doemens Academy in Gräfelfing as well as at the Kiesbye Academy near Salzburg or in other licensed training locations. The members share the common goal to promote the image of the beer culture and to put the professional image of the beer sommelier in the public eye. The association is headed by the managing director, as well as by the six-member managing board, which is elected by the general meeting on a regular basis.

In addition to the website as a central information tool with a beer sommelier search for consumers, companies, media and partners, the association offers the structure for a collegial exchange of experience at annual general meetings as well as in regional section meetings and with regular further education possibilities, the members have the opportunity to keep their knowledge up to date.
